

**Digimind is a Berlin-based Green and Deep Tech company supporting the packaging industry in fast development of novel, innovative and sustainable designs leveraging Digital Twin and Artificial Intelligence**

Digimind is looking for support from a

**Paid internship - Industrial design for sustainable packaging**

We are looking for a student (m/f/d) in Product/Industrial Design, or lateral entries from different backgrounds looking for a career-defining internship, with:

- An outstanding attention to detail, an immaculate sense of proportion and composition.
- Highly self-motivated and self-organized, with an ability to thrive in a fast-paced and high growth environment.
- Solid technical skills and willingness to learn new tools. Reliable skills in Rhino; experience in CAD-Software.

**What You'll Do**

- Work closely with the customer of Digimind on new products, improvements, visualizations, and a wide range of packaging projects.
- Contribute on a conceptual, visual, and technical level, along the entire development path of our products.

**What we offer**

- A motivating and creative work atmosphere that allows your talents to unfold
- An opportunity to hone your skills on real-world projects, in aesthetic product design, technical planning, and production.
- Remote collaboration, or a desk in our Berlin offices.
